

Potential risk factors for *T. gondii* seropositivity in pregnant women of Ethiopia

1. History of abortion/ miscarriage (yes/no)

Fixed-effects inverse-variance model: history of abortion/miscarriage

2. Age category (≥ 35 & 15-34)

Random-effects DerSimonian-Laird model: age (≥ 35) vs age (15-34)

3. Blood transfusion experience (yes/no)

Fixed-effects inverse-variance model: blood transfusion experience

4. Contact with cat(yes/no)

Fixed-effects inverse-variance model: contact with cat

5. Cat presence/ownership(ves/no)

Random-effects DerSimonian-Laird model: Cat presence/ownership

6. Contact with (garden) soil (yes/no)

Fixed-effects inverse-variance model: contact with (garden) soil

7. Dog presence/ownership (yes/no)

Fixed-effects inverse-variance model: presence of dogs

8. Educational level (illiterate/literate)

Fixed-effects inverse-variance model: Educational level

9. Farming or gardening activity (yes/no)

Fixed-effects inverse-variance model: farming/gardening activity

10. Hand washing habit after meat contact (regularly/ sometimes)

Fixed-effects inverse-variance model: handwashing habit after meat handling

11. HIV status (positive/negative)

Fixed-effects inverse-variance model: HIV status

12. Knowledge on toxoplasmosis (yes/no)

Fixed-effects inverse-variance mode: knowledge on toxoplasmosis

13. Number of pregnancy (more than one/first)

Random-effects DerSimonian-Laird model: number of pregnancy

14. Occupation type (housewife & other activities)

Random-effects DerSimonian-Laird model: being house wife vs other activities engaged

15. Raw meat consumption habit (yes/no)

Random-effects DerSimonian-Laird model: raw meat consumption experience

16. Raw milk consumption habit(yes/no)

Fixed-effects inverse-variance model: raw milk consumption experience

17. Raw vegetable consumption habit(yes/no)

Random-effects DerSimonian-Laird model: raw vegetable consumption experience

18. Religion (Christian vs Muslim)

Fixed-effects inverse-variance model: religion

19. Residence (rural vs urban)

Random-effects DerSimonian-Laird model: residence

20. Water source quality (unsafe/safe)

Fixed-effects inverse-variance model: water source
